DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 12 there is recited in the new recitations: "on one of" and a contradictory recitation of "and" for the two following recitations.

For the purpose of this examination they will be considered in the alternative.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-7, 9-12 and 14-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Conway in view of (Bone et al and Fahey).

Conway discloses a computer implemented actual costing method for collecting and presenting an actual cost of performing an activity. Actual costs of performing at least one of: a job performed, an item manufactured or an item purchased, is collected. The activity could be carried out contemporaneously with the performance of the job. There is implemented a selected accounting costing method for actual cost collection and a selected costing method for actual cost presentation (col 2, lines 33-45).

A computer system computes an actual cost of performing an activity from collected actual costs incurred. The system includes at least one processor, at least one data storage device, and processing logic. There is provided a machine-readable medium having stored thereon data representing sequences of instructions which, when executed by a computer system performs specific steps (figs 1 and 9).

Conway does not explicitly disclose:

both costing methods are independent of each other, where the method also may further include a method as recited in claim 2;

a new unique cost identifier is created and stored upon each occurrence of a transaction that affects the actual cost of carrying out the activity.

Also not disclosed by Conway is a cost source identifier that may include: data structure with pointer and date actual cost was incurred, stored cost identifiers organized as a hierarchical structure including nodes, and implemented by rolling up

the actual costs within the cost source identifiers assigned to nodes hierarchically below the selected node level.

Page 4

Bone et al discloses costing methods that may be independent of each other (col 1, lines 10-60, col 2, lines 30-55), where the method also may further include a method as recited in claim 2 (col 3, line 39).

It would have been obvious to one with ordinary skill in the art to utilize independent costing methods to Conway because Bone et al teaches that independence in important because of a particular user's inquiry may not require all database information (col 1, lines 30-32).

Fahey discloses new unique cost identifiers created and stored upon each occurrence of a transaction that affects the actual cost of carrying out an activity. The cost source identifier may include: data structure with pointer and date actual cost was incurred. The stored cost identifiers may be organized as a hierarchical structure including nodes, and implemented by rolling up the actual costs within the cost source identifiers assigned to nodes hierarchically below the selected node level (col 6, lines 53-67; col 7, lines 1-50).

It would have been obvious to one with ordinary skill in the art to include new unique identifiers (which include data structure and date) upon each occurrence of a transaction that affects the actual cost of carrying out an activity to Conway in view of Application/Control Number: 09/235,120

Page 5

Art Unit: 3624

Bone because of what is taught by Fahey. Fahey teaches that a decision support system methodology requires current identifiers (col 1, lines 25-35).

It would have been obvious to one with ordinary skill in the art to include hierarchical structure including nodes, and implemented by rolling up the actual costs to Conway in view of Bone et al because Fahey teaches multidimensional presentation as desirable and comparisons of attributes require comparisons (col 3, lines 18-27; col 4, lines 12-46).

Response to Arguments

5. Applicant's arguments filed 5-1-03 have been fully considered but they are not persuasive.

Conway appears to disclose a sequence of operations carried out while performing the service of the business activity.

Regarding Fahely, table 1 discloses activities which would be obvious to one with ordinary skill in the art to include items manufactured and services being provided because the activities disclose functions that provide manufactured items and services.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alain L. Bashore whose telephone number is 703-308-1884. The examiner can normally be reached on about 7:00 am to 4:30 pm (Monday thru Thursday).

Application/Control Number: 09/235,120

Art Unit: 3624

Page 6

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vincent Millin can be reached on 703-308-1065. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7687 for regular communications and 703-305-7687 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-1113.

Alain L. Bashore
